To date, the County of Maui has upgraded most of central Maui and Kihei to the new automated refuse pick-up system and the Solid Waste Division hopes to automate Upcountry and Lahaina in the next few years. Automated service subscribers - in available areas - are issued one county-owned 96-gallon cart with wheels, designed for the automated truck system. Currently, automated refuse pick-up occurs twice weekly. In the future, the system will convert to a once weekly refuse pick-up an alternate week pick-up service for yard trimmings and recyclables. Appropriate preparation instructions for manual refuse collection and banned materials (see above) apply to the automated system.

### Automated Collection

- Containers must be placed curbside by 5:30 am on designated pick-up day.
- Containers or bags must not exceed 32 gallons or weigh more than 50 pounds.
- Each individual container or bag counts as a single container, regardless of size.
- Yard trimmings must be banded and not exceed 3 feet in length or 50 pounds in weight.
- Place containers no more than 5 feet from curb, accessible and not blocked by vehicles. Allow a minimum 5-foot clearance from plants, mailboxes, concrete walls, fences, etc.
- All containers must be placed at one collection point.
- Each container must have the house number painted on it (do not label county-owned automated carts).
- Addresses with more than one account must not combine containers, but separate containers by account.
- Broken glass and sawdust must be double-bagged.

### Manual Collection

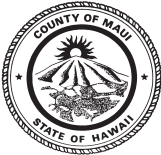

- Yard trimmings, lumber exceeding 3-feet in length
- Concrete blocks, tile, cement, iron pipes
- Acids, explosives, gasoline, unsolidified paint, bulk liquids
- Dead animals, animal feces (animal waste should be flushed down the toilet)
